FMCG SALES ANALYTICS

BUSINESS BACKGROUND

BUSINESS BACKGROUND

1.

BUSINESS

An FMCG company manages hundreds of SKUs distributed across multiple countries and sales channels.

2.

CHALLENGE

Without a centralized reporting system, monitoring sales performance and identifying business opportunities becomes time-consuming and inefficient.

3.

SOLUTION

This dashboard was developed to provide an interactive overview of sales performance and support data-driven decision-making.

BUSINESS PROBLEM

BUSINESS PROBLEM

THIS DASHBOARD AIMS TO ANSWER SEVERAL KEY QUESTIONS:

How is the sales trend changing over time?

Which countries recorded the highest sales volume?

Which product categories contribute the most?

Which products generate the highest profit?

Which products should become business priorities?

PROJECT OBJECTIVES

PROJECT OBJECTIVES

DEVELOP AN INTERACTIVE SALES DASHBOARD CAPABLE OF:

Monitoring key metrics

Tracking sales trends

Evaluating regional performance

Identifying profitable products

Supporting strategic business decisions

DASHBOARD OVERVIEW

- 1.KPI Cards - Monitor business performance
- 2. Interactive Filters - Filter data by Year, Quarter, Month, Sales Channel, Product Category, and Country.
- 3. Country Performance - Compare sales volume across countries.
- 4. Sales Trend - Monitor monthly sales performance.
- 5. Category Sales Performance - Evaluate product category contribution.
- 6. Pareto Analysis - Identify high-impact products
- 7. Top 10 Products by Profit - Identify profitable products

KEY INSIGHTS

4.3%

STABLE YOY GROWTH

Revenue maintained stable year-over-year growth throughout 2024–2025.

\$14.4M

TOTAL NET REVENUE

Total net revenue showed a positive trend from 2023 to 2025, reflecting sustained sales growth across the analysis period.

3.8K

TOTAL QUANTITY SOLD

Product demand remained strong, with total sales volume reaching 3,8K units across all markets.

\$3.3M

GROSS PROFIT

Gross profit continued to grow alongside revenue, demonstrating healthy profitability during the analysis period.

KEY INSIGHTS

LEADING SALES MARKET

USA (United States of America) recorded the highest sales volume, making it the company's strongest-performing market.

MOST PROFITABLE PRODUCT

Laundry Detergent generated the highest profit among all products, making it the company's most profitable product during the analysis period.

TOP PRODUCT CATEGORY

The Beverage category generated the largest share of total revenue, highlighting its importance within the product portfolio.

PROFIT CONCENTRATION

Approximately 80% of total profit is generated by 24 out of 30 products, indicating that profitability is distributed across a broad product portfolio.

BUSINESS RECOMMENDATIONS

1

Increase inventory availability for high-performing SKUs.

2

Improve sales strategies in underperforming countries.

3

Allocate marketing budget toward top-contributing products.

4

Continue monitoring YoY Growth through the dashboard.

TECHNICAL IMPLEMENTATION

1. RAW DATASET

Source: Publicly available FMCG sales dataset from [Kaggle](#).

2. DATA CLEANING AND PREPARATION

Checked missing values, standardized formats, and validated data consistency.

3. ANALYSIS

Built Pivot Tables to summarize sales by product, category, country, and time period.

4. VISUALIZATION

Designed interactive charts and KPI cards using Pivot Charts and slicers.

5. BUSINESS INSIGHTS

Interpreted dashboard findings to support business decisions.

PROJECT IMPACT

BUSINESS VALUE

This dashboard enables stakeholders to:

- Monitor sales performance through interactive KPIs.
- Identify top-performing products and categories.
- Compare regional sales performance.
- Prioritize high-profit products using Pareto analysis.
- Support faster and more informed business decisions.

SKILLS APPLIED

- Excel Dashboard Development
- Sales Analytics
- Business Intelligence
- Data Visualization
- Reporting Automation
